

Domestic Gray Water Reclaim

Now a Days gray Water reuse is Common and regularly procedure, but with conventional treatment unit it is very difficult to reuse the gray Water. Conventional Treatment Systems Requires Very large space, energy & Chemicals so It is not possible to make reuse by conventional means. Utopia Nano Electrochemical device and Membrane Filtration unit are the Heart of the System

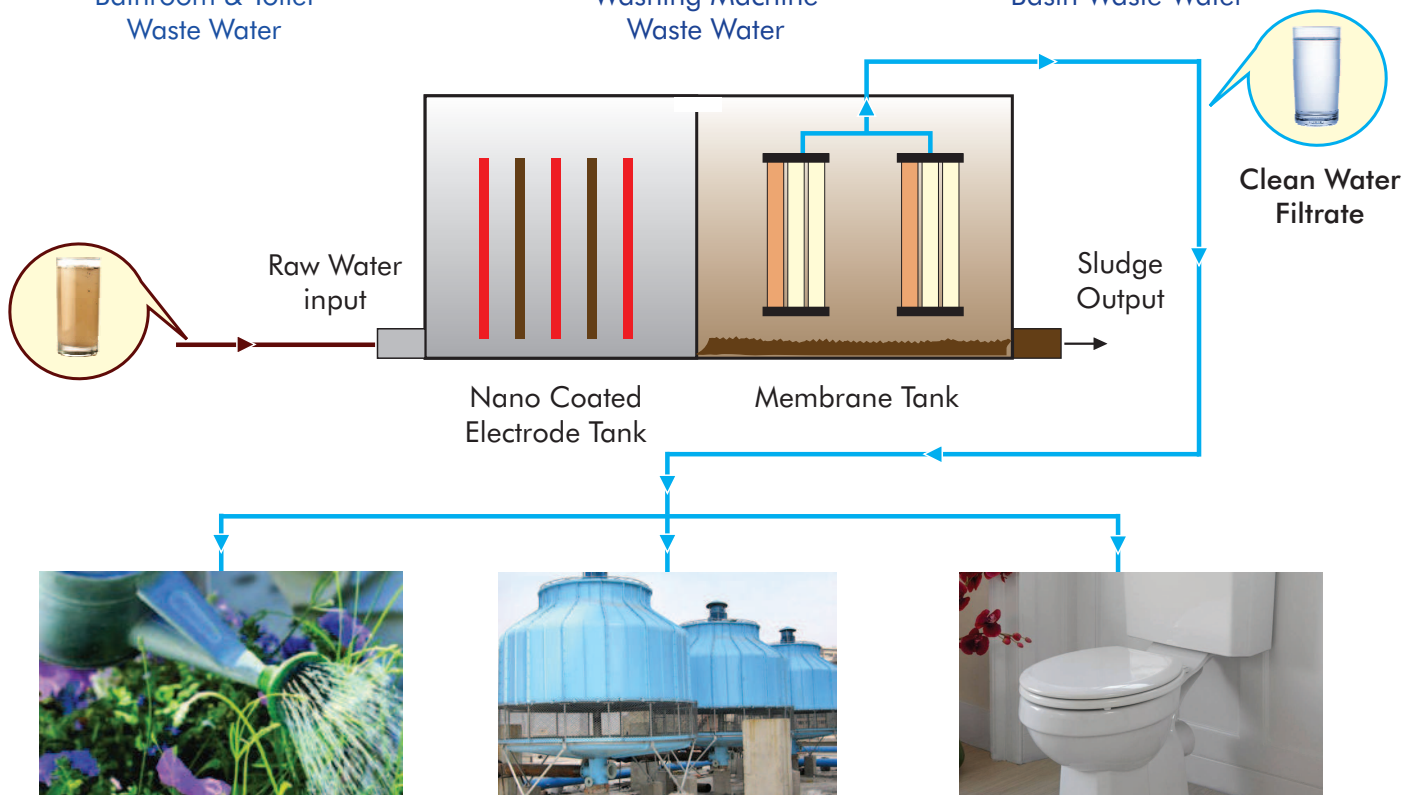

Bathroom & Toilet Waste Water

Washing Machine Waste Water

Basin Waste Water

Advantages-

- Guaranteed Performance with Very Less Energy and Chemical Requirement.
- Operating Life of the System is More than 10 years with 5 Years Guarantee of System Operation.
- Less Foot Print Area required almost 1/20 th of Conventional Method (20 times less than Conventional Treatment)
- Fully Automatic System with No Manual Intervention is required.
- Easy Operation with Compact Skid Mounted Unit.
- No any Bacterial Cultural Maintenance and Preparation.
- More than 80% Water Recovery is Possible.
- Very Less Sludge Generation Less than 3% of total capacity.
- No more Hydraulic retention is required based on Online Process.
- Sludge generation is Compact & De watered so easy sludge handling.
- Low Capital and Operating Cost compare to any available working Technology.
- Treated Water Quality up to Potable Water Quality Grade.
- Can Withstand with Waste water Quality Variations.
