

Sewage Waste Water Treatment

Utopia Eclear Sewage Waste Water Treatment system is based on the advanced Nano Technology. Utopia Developed Three Step Solution for the Waste Water Treatment which make possible to Reuse the Waste Water. Utopia Eclear Treated Water Match the Potable Water Quality.

Advantages-

- Guaranteed Performance with Very Less Energy and Chemical Requirement.
- Operating Life of the System is More then 10 years with 5 Years Guarantee of System Operation.
- Less Foot Print Area required almost 1/20 th of Conventional Method (20 times less than Conventional Treatment)
- Fully Automatic System with No Manual Intervention is required.
- Easy Operation with Compact Skid Mounted Unit.
- No any Bacterial Cultural Maintenance and Preparation.
- More than 80% Water Recovery is Possible.
- Very Less Sludge Generation Less than 3% of total capacity.
- No more Hydraulic retention is required based on Online Process.
- Sludge generation is Compact & De watered so easy sludge handling.
- Low Capital and Operating Cost compare to any available working Technology.
- Treated Water Quality up to Potable Water Quality Grade.
- Can Withstand with Waste water Quality Variations.
